

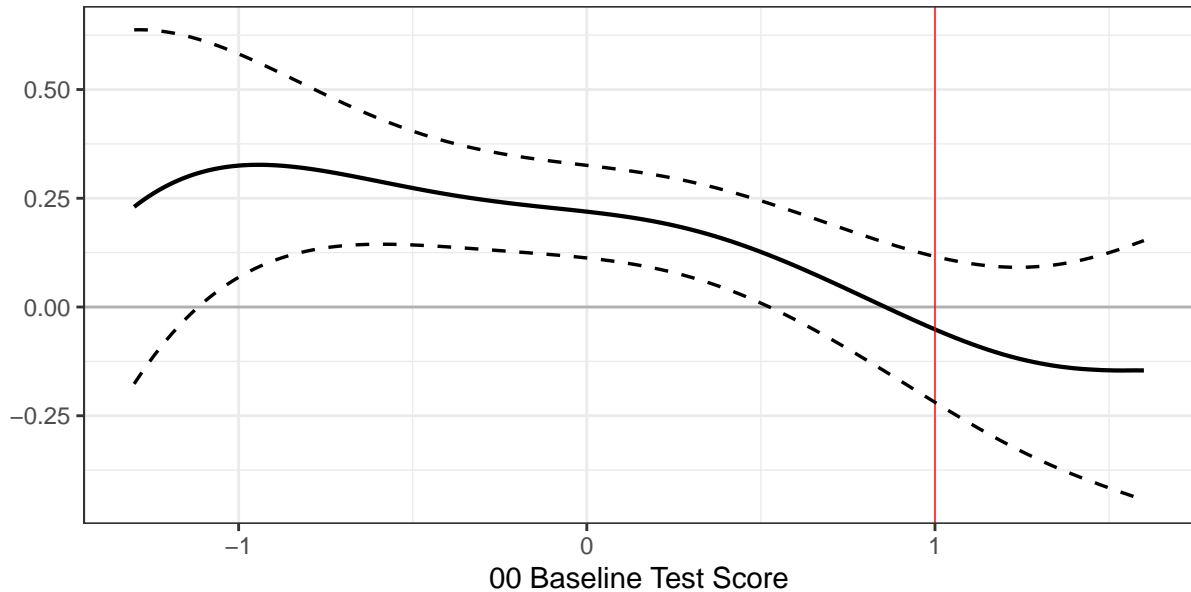

Figure 3: Year 1 (2001) Test Score Impacts by Baseline (2000) Test Score Difference Between Program and Comparison Schools, Cohort 1

Nonparametric Fan Locally Weighted Regression.

Dashed lines represent bootstrapped 95% confidence intervals of the treatment control

Treatment-Control Difference of 01 Test Score

Dashed line represents 0 standardized test score.

Horizontal line represents minimum winning score in 2001.

Local linear regressions use Epanechnikov kernel with .4 bandwidth. Bootstrapped CIs based on 50 replications.
